

HIVE access levels & permissions (proposal v4)

1. How it works

HIVE access model (proposal)	
The idea in one line	Every person gets ONE access level, a SHORT list of on/off categories (about 15 instead of 83), and a SCOPE that says WHOSE information those categories apply to.
1. Access level	Owner, Admin, or Staff. Fixed by HIVE. Sets the ceiling of what's possible. HRC committee members are Staff with the "HRC Committee" preset. See sheet 2.
2. Categories	18 broad switches (Billing, Documentation, Scheduling...). Each is Off / View / Edit. Edit = create, change, approve, and export. Sheet 7 explains exactly what each setting allows and doesn't allow.
3. Scope	WHO the categories apply to: Whole agency, Assigned homes, Assigned staff, Assigned clients, or Only themselves. Homes, staff and clients can be combined. See sheet 4.
4. Preset	A saved combination of level + categories + scope type, named by the agency ("Supervisor", "Manager", "Lead"...). Pick a preset when you hire; tweak per person if needed. See sheet 3.
5. Job title	Free text for display (profile, roster, face sheet). Has NO effect on access.
6. Staff type	DSP, Host Home Provider, etc. Drives which compliance items they owe. Has NO effect on access.
Example	Sarah is the Maple House manager. Level = Admin. Preset = Group Home Manager. Scope = Maple House. She sees billing, documentation, schedules and timesheets for every Maple House client and staffer, and nothing for anyone else in the company.
How to read sheet 3	Green = Edit, Blue = View, Grey = Off, Purple = Owner only (can't be granted to anyone else). Presets are examples; agencies rename, copy and adjust them.
Editing	Every value cell has a dropdown, colors update when you change them, and the Lists tab controls what's in each dropdown. Blank rows and Custom preset columns are ready for new categories/presets.
How to read sheet 5	Every one of today's 83 permissions, and which new category + action it folds into. Nothing is lost; it's regrouped.

2. Access levels

Level	Who it's for	What's locked / guaranteed	Customizable?	Default scope
Owner	Business owners and the few people who hold the keys.	Always has everything; can't be edited or locked out. Only Owners: billing/subscription, agency settings, permissions, promoting/demoting Owners and Admins, deleting the agency. At least 1 Owner required.	No. Owners are always full access.	Whole agency (locked)
Admin	Anyone who works in the web dashboard: program managers, home managers, HR, billing, office.	Can never touch Agency settings & permissions. Can't edit Owners. Can't give anyone a permission they don't have themselves.	Yes: every category Off/View/Edit, plus scope.	Set by preset
Staff	DSPs and other direct-care staff who use the phone app, plus HRC committee members (via the "HRC Committee" preset).	Phone app only; no web dashboard. Can see only their own record and today's clients unless given a scope.	Limited: categories up to View; Documentation up to Edit (e.g. a Lead DSP approving notes in the app); HRC up to Edit (HRC Committee preset).	Only themselves

3. Presets matrix

Category	What it covers	Limited by scope?	Owner	Program Manager	Group Home Manager	HR / Office	Billing	DSP	Lead DSP	HRC Committee	Custom preset 1	Custom preset 2	Custom preset 3
Access level			Owner	Admin	Admin	Admin	Admin	Staff	Staff	Staff			
Scope (whose info)			Whole agency (locked)	Whole agency	Assigned homes	Whole agency (staff only)	Whole agency	Only themselves	Assigned home	Assigned clients			
Staff roster & profiles	See the staff list, open profiles, edit names/phone/hire date/job title.	Yes	Edit	Edit	View	Edit	View	Off	View	Off			
Hire & deactivate staff	Add employee, upload roster, send invites, reset passwords, deactivate/reactivate.	Yes	Edit	Edit	Off	Edit	Off	Off	Off	Off			
Staff compliance file & training	Staff file items, evidence uploads, cert approvals, assigning training, courses.	Yes	Edit	Edit	View	Edit	Off	Off	Off	Off			
Clients & charts	Client list, chart, goals, client documents, intake.	Yes	Edit	Edit	Edit	Off	View	Off	View	View			
Client medical & medications	Diagnoses, medical info, medication list, eMAR admin.	Yes	Edit	View	View	Off	Off	Off	View	View			
Documentation review	Shift notes, daily logs, form submissions: read, correct, approve.	Yes	Edit	Edit	Edit	Off	View	Off	Edit	Off			
Incidents	Incident reports: read, manage, export.	Yes	Edit	Edit	Edit	View	Off	Off	View	View			
HRC / rights restrictions	Human Rights Committee reviews and rights-modification records.	Yes	Edit	Edit	View	Off	Off	Off	Off	Edit			
Scheduling	See the schedule, create/edit/delete shifts, approve	Yes	Edit	Edit	Edit	View	View	Off	View	Off			

[illegible]

4. Scope rules

Scope option	What they can see	Example
Whole agency	Every client and staffer in the agency, for each category they have on.	Program Manager sees billing for all homes.
Assigned homes	Everyone tied to the home(s) they're assigned: clients who live/are served there, staff on that home's team or scheduled there, and that home's shifts, timesheets, notes, incidents and billing.	Maple House manager: all Maple House clients and staff; nothing from Oak House.
Assigned staff	Specific staff and/or admins picked by name (the Connecteam model). Unlocks THEIR records only: profile, schedule, timesheets, pay, compliance file, training — for whichever categories are on. Does NOT unlock the clients those staff serve.	HR lead is assigned 3 office admins; a home manager is also assigned one floater DSP.
Assigned clients	Specific clients picked by name. Unlocks THEIR records only: chart, medical, notes/logs about them, incidents, HRC, billing — for whichever categories are on. Shows the names of staff who worked with them, but not those staff's full profiles or pay.	A behavior specialist is assigned 4 clients across different homes.
Combining	Homes, assigned staff and assigned clients stack: the person sees everyone in ANY of their lists. Nothing is unlocked indirectly (seeing a staffer never reveals their clients, and seeing a client never reveals their staff's pay).	Maple House manager + one floater DSP + one client who attends day program elsewhere.
Only themselves	Their own profile, schedule, timesheets and training, plus the clients on their shift today.	A DSP on the phone app.
Tricky case	Suggested rule	Why
Staffer works at two homes	Assign them to each manager (Assigned staff or via each home). Every assigned manager sees their full staff record, within what that manager's preset allows.	Decided 2026-09-25: staff can be assigned to multiple managers.
Floater / on-call DSP	Add them to a manager as Assigned staff, or leave them whole-agency for Program Managers only.	Avoids inventing a fake 'home' for floaters.
Client moves homes	The new home's manager gets the chart from the move date forward; the old manager keeps read-only history up to the move date.	Billing and notes stay with the home that delivered the service.
Client has services in two places (e.g. home + SEI day program)	Assign the client to each manager who needs them. Every assigned manager sees the full client record, within what that manager's preset allows.	Decided 2026-09-25: clients can be assigned to multiple managers.
An Admin supervises other Admins	Allowed: assign Admins as Assigned staff. They see those Admins' staff records, not their permissions.	Only Owners change access.
Who can change scopes?	Owners only (it's part of Agency settings & permissions).	Stops a manager widening their own view.

5. Old 83 to new

Today's group	Today's permission (as shown on profile)	Internal key	New category (dropdown)	Counts as (dropdown)	Note
People & Files	Invite staff	invite_staff	Hire & deactivate staff	Edit

Employee loans	0
Agency settings & permissions	7
Phone app basics	11
(HIVE internal)	2
Total	83
Updates automatically when you rename a category on the Presets matrix or change a row on sheet 5. Total should stay 83.	

7. What each setting means

What each setting allows and doesn't allow. This is the text HIVE shows in the drop-down under each permission. Edit any cell; the platform copy is built from this sheet. Everything applies only to people inside the person's scope.

Category	What it covers	Off	View	Edit
Staff roster & profiles	The staff list and each person's profile.	Can't see the staff list or open anyone's profile.	Can see the staff list and open profiles (contact info, hire date, job title, home). Can't change anything.	Everything in View, plus edit names, phone, email, hire date, job title and home. Can't hire, deactivate, or change anyone's access.
Hire & deactivate staff	Bringing people on and taking them off.	Can't add, invite, or deactivate anyone.	Can see pending invites and deactivated staff. Can't add, invite, reset passwords, or deactivate.	Can add employees, upload a roster, send and resend invites, reset passwords, deactivate and reactivate. Can't choose anyone's access level or preset (Owners only).
Staff compliance file & training	Staff file items, evidence, certifications, training.	Can't see anyone's staff file, certifications or training.	Can see staff file items, uploaded evidence, certification status, training progress and team compliance reports. Can't upload, approve, or assign.	Can upload and file documents, approve certifications and evidence, assign training, create and edit courses, and manage obligations.
Clients & charts	The client list, charts, goals, documents, intake.	Can't see clients (except the clients on their own shift, if Phone app basics is On).	Can see the client list and open charts, goals, documents and intake info. Can't change anything. Medical info is a separate setting.	Can add clients, edit charts, goals and documents, and run intake. Can't see medical info unless Client medical is also on.
Client medical & medications	Diagnoses, medical info, medication list, eMAR.	Can't see diagnoses, medical info or medications.	Can see diagnoses, medical info, the medication list and eMAR history. Can't change them.	Can edit medical info and the medication list and manage eMAR. (Passing meds on a shift is part of Phone app basics.)
Documentation review	Other people's shift notes, daily logs, form submissions.	Can't see other people's shift notes, daily logs or form submissions.	Can read shift notes, daily logs and form submissions. Can't correct, send back, or approve them.	Can read, correct, send back and approve shift notes, daily logs and form submissions.
Incidents	Incident reports after they're filed.	Can't see incident reports. (Can still report one from the phone app if Phone app basics is On.)	Can read incident reports. Can't update, close, or export them.	Can manage incidents (follow-up, status, close) and export incident reports.
HRC / rights restrictions	Human Rights Committee reviews and rights-modification records.	Can't see HRC reviews or rights-modification records.	Can read HRC reviews and rights-modification records. Can't add, change, or record decisions.	Can create and update HRC reviews, record decisions, and manage rights-modification records.
Scheduling	The shift schedule.	Can't see the schedule (except their own shifts in the phone app).	Can see the schedule. Can't create, change, or delete shifts.	Can create, edit and delete shifts, set up recurring shifts, and approve swaps. HIVE still blocks shifts with no active authorization.
Timesheets & EVV	Other people's timesheets and EVV records.	Can't see anyone else's timesheets.	Can see timesheets and EVV records. Can't edit, approve, or export them.	Can edit and approve timesheets and export EVV data.

Billing	Billing, claims, authorizations (1056), service codes.	Can't see billing, claims, authorizations or service codes.	Can see billing, claims, authorizations and service codes. Can't change or submit anything.	Can manage billing and claims, authorizations and service codes.
Payroll	Payroll runs and pay data.	Can't see anyone's pay.	Can see payroll runs and pay data. Can't change or run payroll.	Can run and change payroll.
Financial reports	Gross revenue, RHS financials, employee cost reports.	Can't see financial reports.	Can see gross revenue, RHS financials and employee cost reports. Can't export them.	Can see and export financial reports.
Reports, analytics & audit trail	Dashboards, CSV reports, practice audit, audit trail.	Can't see dashboards, reports or the audit trail.	Can see dashboards, analytics and the audit trail. Can't export reports.	Can also export CSV reports and run practice audits.
Hosts & referrals	Host Home Provider cards and referrals.	Can't see host cards or referrals.	Can see host cards and referrals. Can't change status, notes or links.	Can manage host cards and referrals (status, notes, links).
Employee loans	Loan agreements, e-signature, loan ledger.	Can't see employee loans.	Can see loan agreements, signatures and ledgers. Can't create, edit, send for signature, or delete.	Can create and edit loans, send them for e-signature, add ledger entries, and delete loans.
Agency settings & permissions	Agency setup, form builder, access levels, presets, scopes, email sending.	Everyone except Owners. Can't be given to anyone else.	(not available)	Owners only: agency setup, form builder, access levels, presets, scopes and email sending.
Phone app basics	The staff phone app for their own work.	Can't use the phone app's work features.	(On/Off only)	On: can clock in/out, see own timesheets, write shift notes and daily logs, submit forms, report incidents, pass meds (eMAR), and do their own training and certs. Only their own work and today's clients.
Blank rows below are for new categories.				

Lists

Permission values	Phone values	Access levels	Scope options	Limited by scope?	Categories (auto from matrix)	Counts as
